STANDARD SECURITY BARRIER™

(and variations) PATENT PENDING

When extra security is needed, the **Hale Security Pet Door®** **STANDARD SECURITY BARRIER™** is the answer. Keep humans from gaining access through your pet door. This attractive, effective barrier is mounted on the outside of your home. It fits over and obstructs the view of the pet door.

The innovative design with its limited space and angle of entrance makes it extremely difficult for a person to gain access.

- Attractive and effective – 10 sizes and three rooflines available – Available in 7/8” cedar wood tongue and groove boards
- Safe for your pets – **no magnets – no collars – no shocks**
- Highly effective at keeping unwanted animals (two-legged or four-legged) from gaining access to your home
- Optional sensor will sound an alarm if an attempt is made to move the barrier – can be battery operated or hardwired to your house alarm system
- Each leg adjustable by 2” to allow installation on uneven ground.
