# Hale Pet Door™ Screen Model

The Hale Pet Door™ "Screen Model" is our most simple model. It is designed to fit into almost any screen door or window screen. The screen model has been specially simplified for this application and therefore only has a single flap and no security cover. Instructions for installation included in the box or on our website. We offer technical support when needed and professional installation is available in many locations nationwide.

## SPECIFICATIONS:

**Flaps:** Single flap made of flexible 3/16" clear PVC vinyl. Also available in black or white.

**Main Frame:** Extruded 6063-T5 aluminum with .063" wall thickness. Straddles the screen frame on outside and bottom. Designed to accept frame thicknesses up to 1/2". Can be factory modified for thicker frames by removing the outside leg.

**Spline Frame:** Extruded 6063-T5 aluminum with .063" wall thickness. Attached to main frame and is the top and inner side of the pet door.

**Alnico5 Magnets:** A 1/4" rod magnet 1 1/2" long made from an aluminum, nickel and cobalt alloy known for its strength and durability. Door size determines number of magnets.

**Strikes:** Made of ferrous stainless steel. 1 1/2" long, 3/4" tall and 1/32" thick. U shaped with interior prongs, when squeezed onto the vinyl flap, the barbed prongs hold firmly.

**Weather stripping:** Flap is surrounded by 1/2" nylon pile for maximum insulation. Nylon is woven into a backing 9/32" wide and 1/32" thick.

## OPTIONS:

**Flaps:** *Training flap*—use for a limited time when pet is timid and getting used to the pet door. *Polar flap*—use in extremely cold climates or where a softer flap is desired.

**Frame Colors:** Available in four color choices—Brushed aluminum, dark bronze, white and Arizona beige.

**Sizes:** 11 standard sizes available from small to giant. Custom sizing also available.

**Positioning:** If main frame has not been modified, screen model is reversible and can fit either side of a screen door or window. For screen doors or windows over 1/2" can be mounted inside or outside, generally on the same side as the screen mesh and spline.

## OUTSTANDING FEATURES:

- Energy efficient
- Easy to clean
- Effective insect and rodent control

## APPLICATIONS:

Designed to be installed through almost any screen.

- Window screens
- Door screens

Not functional for security screen doors
